

Group ■ RDI ■ PPI

Pfam

Signature

Helicase conserved C-terminal domain

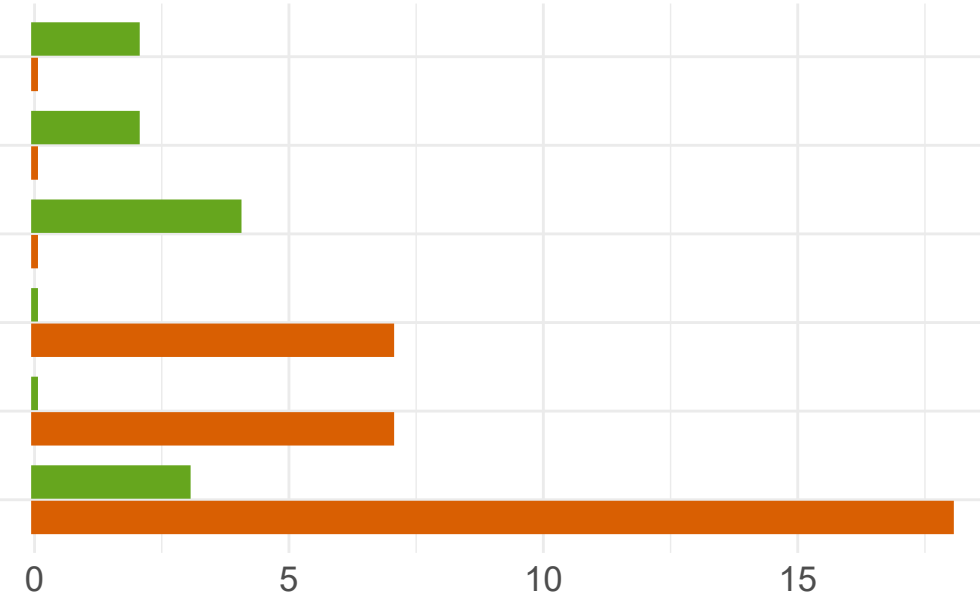

3' exoribonuclease family, domain 1

LSM domain

IMP dehydrogenase / GMP reductase domain

CBS domain

RNA recognition motif. (a.k.a. RRM, RBD, or RNP domain)

SUPERFAMILY

Nucleotidyl transferase

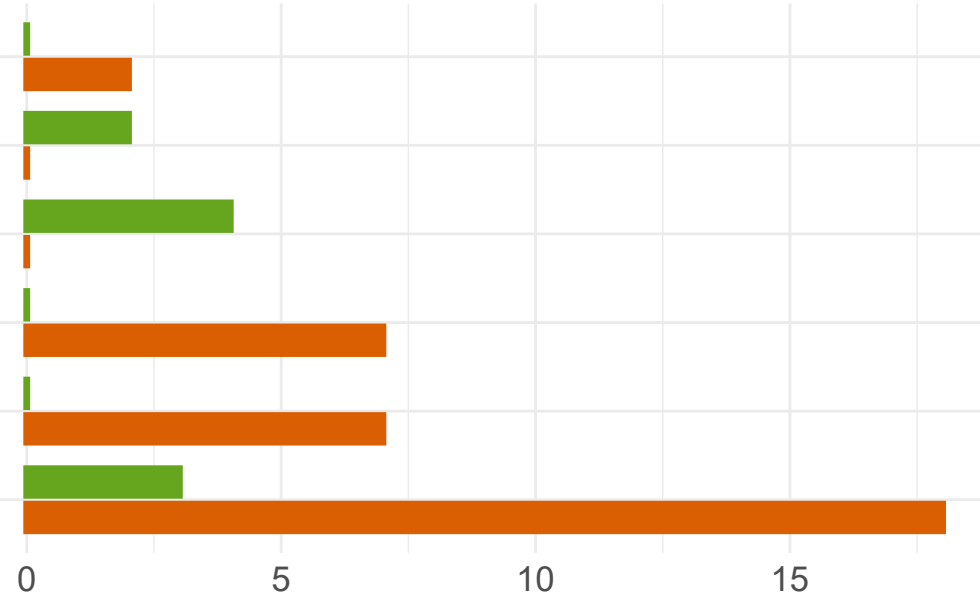

Ribosomal protein S5 domain 2-like

Sm-like ribonucleoproteins

Inosine monophosphate dehydrogenase (IMPDH)

CBS-domain pair

RNA-binding domain, RBD

Baits with overrepresented signature
