

Group RDI PPI Signature RNA related Not RNA related

### Pfam

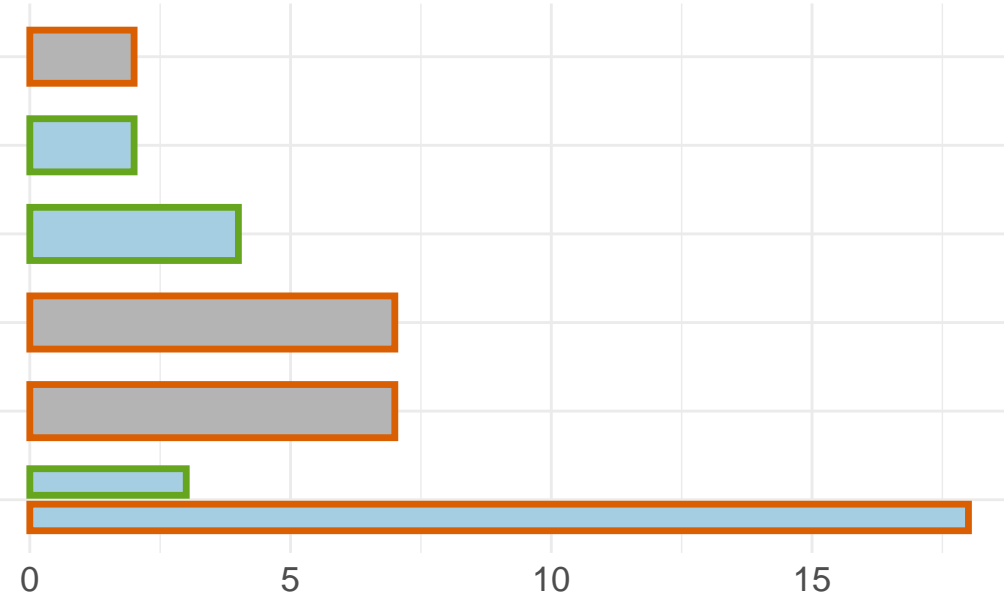

### SUPERFAMILY

Signature

Helicase conserved C-terminal domain  
3' exoribonuclease family, domain 1  
LSM domain  
IMP dehydrogenase / GMP reductase domain  
CBS domain  
RNA recognition motif. (a.k.a. RRM, RBD, or RNP domain)

Nucleotidyl transferase  
Ribosomal protein S5 domain 2-like  
Sm-like ribonucleoproteins  
Inosine monophosphate dehydrogenase (IMPDH)  
CBS-domain pair  
RNA-binding domain, RBD

Baits with overrepresented signature
