active ion transmembrane transporter activity	carboxylic acid transmembrane transporter activity	nucleobase–containing compound transmembran transporter activity	I nucleotide transmembrane	organic acid transmembrane transporter activity	ATP-dependent activity, acting on DNA	catalytic activ acting on DN	
active transmembrane transporter activity	cation transmembrane transporter activity proton transme	organic anion transmembrane embrane transporter	rane transporter activity		DNA helicase activity		oxidoreductase activity
anion transmembrane transporter activity	ion transmembrane transporter activity		secondary active transmembrane transporter activity		structural constituen		acyltransferase activity
carbohydrate derivative transmembrane transporter activity	L–amino acid transmembrane transporter activity	organophosphate ester transmembrane transporter activity ti	transporter activity transmembrane transporter activity		structural constituen		helicase activity
